

			1st Inspection			2nd Inspection		
Outfall(s)	Facility or Location	Installation Date	Date	% Full	Notes	Date	% Full	Notes
Industrial Locations (7)								
WR-123	Schnitzer International Slip	11.15.07	12.11.07	1/8"-3/4"	Rusty loose flocculent sediment, very difficult to see through bottles and determine exact volume of sediment	01/11/2008	?	Bottles were so opaque and rust colored that it was impossible to determine the amount or type of sediment.
WR-96	Arkema	11.13.07	12.11.07	0	No sediment to classify	01/15/2008	trace	Barely a trace of sediment in any of the bottles. Water was slightly yellowish but mostly clear.
WR-14	Chevron - Transportation	11.13.07	12.10.07	1/8"	Dark, flocculent material	01/10/2008	1/8"-1/2"	Loose dark flocculent material
WR-161	Portland Shipyard (Cascade General Site)	11.13.07	12.11.07	1/8"-1/4"	Dark flocculent sediment, some rust coloration	01/10/2008	trace - 1/16"	Dark sediment
WR-4	Sulzer	Not Installed - No Feasible Location						
WR-142	Gunderson	11.14.07	12.10.07	1/8"	Dark flocculent sediment	01/09/2008	1/8"-1/4"	Dark flocculent sediment.
WR-147	Gunderson (former Schnitzer)	11.14.07	12.10.07	1/8-1/4"	Dark flocculent sediment	01/09/2008	1/8"-1/2"	Dark flocculent sediment. Bottles opaque and hard to see through
Land Use Locations (5)								
HWY 30	Hwy 30	11.12.07	12.10.07	0	Bottles have not been over-topped by water.	1.9.07	0-trace	Replaced bottles with new shorter bottles. Only the angled tall bottles had any sediment.
Hwy 30 "B"	Hwy 30	11.14.07	12.10.07	trace	Trace amounts of loose sediment	01/11/2008	trace- 1/4"	Loose dark flocculent material. Replaced all bottles with short bottles.
OF-49	City - St. Johns Area	11.12.07	12.11.07	trace	Not enough material to classify	01/10/2008	trace- 1/4"	Loose flocculent sediment.
OF-22B	City - Doane Lake Industrial Area	11.15.07	12.11.07	1/8"	Dark, flocculent material	01/03/2008	1/4"-1/2"	Loose flocculent sediment, bottles opaque and hard to see through. Terra Hydr modified wier to raise bottles 2.5". Bottle tops level with lip of wier
WR-218	UPRR Albina	11.21.07	12.11.07	1/8"-3/4"	Very loose flocculent sediment	01/10/2008	Trace - 1/2"	Loose flocculent rust colored sediment.
Multiple Land Use Locations (1)								
OF 18	City - Multiple Land Uses	11.12.07	12.10.07	1/2-7/8 full	Consolidated, stratified layers of sandy sediment, organic material, and loose flocculent sediment BOTTLES ARCHIVED IN FIELD LAB	01/10/2008	3/4"-1.5"	Sandy sediment with some organic material. Top layer consisted of loose flocculent sediment. Removed all bottles to be archived, replaced with two tall and two short bottles.
